## EDUCATION

---

Deree - The American College of Greece

Athens, Greece

B.Sc(Hons) in Information Technology

Expected Graduation, May 2027

- **Concentrations:** Software Development
- **GPA:** 3.7/4.00
- **Related Coursework:** Information Technology Fundamentals, Introduction to Programming, Multimedia and Web Design, Cybersecurity, Operating Systems, Computer Architecture, Object Oriented Programming

## EXPERIENCE

---

Icontap

Athens, Greece

Full Stack Engineer

January 2024 – Present

- Led the development of over 5 new features, including the successful integration of Google Wallet API and Apple's PassKit, significantly enhancing user convenience by enabling seamless digital pass storage within our web application.
- Engineered robust backend solutions using PHP and Laravel, which improved system scalability and maintainability, supporting a growing base of users.
- Built and managed Docker containers across multiple stages of development, ensuring consistent and reproducible environments..
- Optimized and updated MySQL relational databases, enhancing performance and data retrieval speeds, thereby improving overall application responsiveness.
- Developed and maintained multiple custom front-end components, utilizing HTML, CSS, JavaScript, and React.js.
- Collaborated closely with a team of 4 and contributed ideas in planning sessions, demonstrating strong teamwork and communication in a fast-paced startup environment.
- Conducted extensive research on potential new features, successfully proposing and leading the integration in our web application.
